50	Empire Petroleum	3,320	2,760	3,359	83%	493	Permian	63	13	0

Note | Companies are ranked by average gross operated production from onshore wells in the Lower 48 states. Production and ranking for both 1H24 and 2023 include all gross operated production from assets and companies acquired up to and including 10/10/24 as accounted for in Enverus' platform; as a result, all changes in rankings are based on organic production changes on the post-transacted assets. Oil production includes condensate. Primary Enverus Region refers to the region with the highest contribution to production and ranking in this table, not necessarily for the company as a whole. Rig numbers are as of 10/10/24. Numbers are subject to change because of lags in reporting.

📌 signifies the largest change in rank.
